Outlook Web Access (Webmail), Cal OES HQ

On 02/04/18, the Cal OES Internet Technology Duty Officer (IT DO) advised that issues have been identified when logging onto the Outlook Web Access (OWA Webmail) system. Cloud servers have been identified as the source. As a result, some configurations have been modified to bypass the workload and sharing process. Cal OES IT is working with Microsoft to restore the servers to normal operations.

WEATHER SYNOPSIS BY REGION

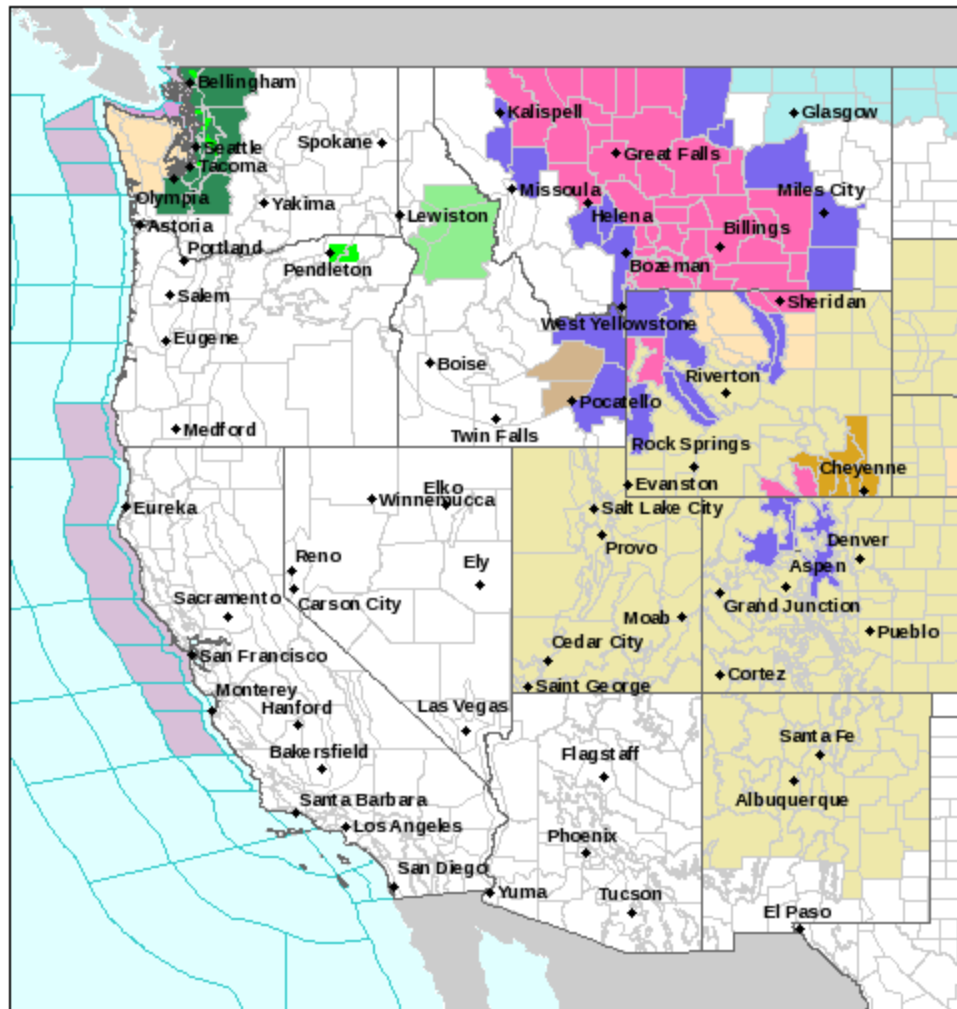

NORTHERN CALIFORNIA

Strong high pressure will remain in place near the West Coast through the remainder of the week, maintaining unseasonably warm daytime temperatures across the region. Long range forecast models remain dry through the middle of the month. Some patchy morning valley fog may develop at times through the forecast period.

SOUTHERN CALIFORNIA

High pressure over California will continue the dry weather pattern with above average temperatures through next Friday. Weak onshore flow and a shallow marine layer could bring some patchy late night and early morning low clouds and fog near the coast early Monday and Tuesday and again later in the week into next weekend. Weak offshore flow for Wednesday and Thursday could bring some gusty northeast winds near the coastal foothills.
